Monthly Equity Roundup – August 2010

August 2010-Review

Indian markets ended in the green with marginal gains for the month of August, 2010. The Sensex and Nifty ended with a month on month gain of 0.58 and 0.65 per cent respectively. However, the smaller cap indices outperformed the broader market with the BSE Mid Cap and BSE Small Cap gaining by 2.55 per cent and 2.05 per cent, respectively.

The month started off on a bullish note on the back of strong auto sales from vehicle makers for the month of July 2010. Besides this, India's exports rose consistently for the tenth month in a row in July, growing by 13.2 per cent to USD 16.24 billion, albeit at slower rate. Earnings upgrades were witnessed in certain large cap companies like State Bank of India, Tata Consultancy Services, ITC, Tata Motors and HCL Technologies.

On the macroeconomic front, the country witnessed a revival in the monsoons and a growth in exports during July. India's July exports rose 13.2 per cent YoY to USD 16.24 billion while imports for the month rose by 34.3 per cent to USD 29.17 billion, with country's trade deficit at USD 12.93 billion for July 2010. However according to the trade secretary Mr. Rahul Khullar, India's trade deficit for the current fiscal year 2010-11 is expected to be at least USD 120 billion, which will create a necessity to spur exports during the fiscal. The government has also announced certain schemes to boost labour intensive export sectors. IIP numbers were subdued with growth of 7.1 per cent as against the previous month's annual growth of 11.3 per cent (revised figure). However, there was a marked improvement in the growth of six core sectors (Crude oil, petroleum refinery, electricity, cement, steel and coal), which registered a growth of 3.9 per cent for the month of July as compared to 3.2 per cent for the same month last year. The growth was mainly driven by higher crude oil and petroleum refinery production.

The market also had its share of weak global cues; Fears of a slowdown in global growth spooked equity and commodity markets across the globe, with Indian stocks being no exception. The key benchmark indices edged lower in the week ended Friday, 27 August 2010, halting a three-week rising trend, on weak global cues. Second-quarter GDP for the US market was revised to an annual growth rate of 1.6 per cent, according to new government estimates. The figure dropped significantly from the initial reading of 2.4 per cent, but remained above the market expectations of a slide to 1.4 per cent. Moreover, the sales of existing homes in the US plunged a record 27 per cent last month, prompting a sell-off.

Source: MFI Explorer, Bharti-AXA Life Insurance

Among BSE Sectoral indices, BSE Power and BSE Metal Index fell the most as they registered a decline of 2.7 per cent and 2.5 per cent, respectively. Among others, the BSE Oil & Gas and IT indices registered a decline of 2.4 per cent and 1.8 per cent, respectively. The performance of BSE PSU remained almost stagnant over the month. Amongst the gainers, BSE Consumer Durables was the top performer with a gain of 7.1 per cent followed closely by BSE Bankex with a gain of 5.6 per cent.

Now, let's take a look what the Institutions did last month.

During the month ended August 2010, FIIs have been net buyers of about Rs 11,414 cr in comparison to net buying of Rs 16,617 cr in the previous month. On the contrary, mutual funds have been the net sellers of Rs 2,825 cr in the month ended August 2010. Looking at the past trend, FII remained strong buyers consistently for last three months whereas mutual funds were the net sellers for last twelve months. With the infusion of Rs 11,414 crore by the FIIs in August, the total investment in the Indian equities by the FII has reached to Rs 59, 382 crore till now in the current calendar year.

Global Markets

During the month of August, developed markets largely remained in red. Nikkei declined by 7%, followed by Dow Jones that declined by 4%. The US second quarter GDP was revised to an annual growth rate of 1.6 per cent, according to new government estimates. The figure dropped significantly from the initial reading of 2.4 per cent, but topped expectations of a slide to 1.4 per cent. The fall in the Japanese stocks was the sharpest on back of recent rally in yen's value, which surged to a 15-year high against the dollar. However, emerging markets continued their outperformance with Sensex, Shanghai and Malasiyan markets ending in positive territory.

Q1FY11 earnings review – Driven by foreign subsidiaries

In Q1FY11, the adjusted earnings of the companies in the Sensex registered a growth of 24.4 per cent year on year (YoY), which were marginally ahead of expectation. However, most of the growth was driven by strong performance of foreign subsidiaries, which in certain cases has swung from loss to profit. Amongst most notable companies with sharp improvement in foreign subsidiaries were Tata Motors and Hindalco. Standalone net profit of sensex grew by 3% while sensex ex-oil grew by 7.5%.

Economy

GDP for Q1FY11 grows at 8.8 per cent YoY

India's economy grew at its fastest rate in nearly three years in the quarter ending on June on back of strong growth of 12.4 per cent exhibited by manufacturing sector and agriculture sector that may keep the central bank on its policy tightening path. The 8.8 per cent expansion compares with a median forecast of an annual rise of 8.7 per cent in a Reuters' poll and ahead of the 8.6 per cent GDP growth posted during 4QFY2010. Agriculture sector grew 2.8 per cent in the June quarter compared with 1.9 per cent rise in the year-ago quarter. Mining output grew 8.9 per cent, compared with a rise of 8.2 per cent. Financing, insurance, real estate and business service grew 8.0 per cent versus 11.8 per cent. Construction grew 7.5 per cent versus 4.6 per cent. With economic growth well on track, the RBI's prime focus in FY2011 would be on controlling inflation, which is becoming more broad based.

IIP grows by 7.1 per cent in June 2010

IIP has expanded by 7.1 per cent YoY in June 2010. The Mining, Manufacturing and Electricity expanded by 9.5 per cent, 7.3 per cent and 3.5 per cent YoY respectively. The core sector, which comprises of six infrastructure industries, accounts for over a quarter of the country's industrial production, grew by 3.9 per cent in July, mainly due to a decline in the output of cement and finished steel. Crude Oil was the best performer with a growth of 15.8 per cent YoY.

Exports rise 13.2 per cent in July, trade deficit widens

The country's exports rose 13.2 per cent last month to USD 16.24 billion, compared to USD 13.62 billion in July last year, but lower than USD 19 billion in July 2008. Imports, meanwhile, jumped 34.3 per cent to USD 29.17 billion in July, compared to USD 19.62 billion in 2009-10. The trade deficit, or difference in exports and imports, inched towards USD 13 billion in July, the highest in the last 22 months, from USD 10.6 billion in the same month last year. Trade deficit in the first four months (April-July) of the current financial year reached USD 43.6 billion.

Corporate tax collections rise 21.7 per cent in Q1FY11

The government's corporate tax collections grew a strong 21.7 per cent in the first quarter of the current fiscal, indicating that the economic recovery was beginning to translate into better profits for companies. Overall direct tax collections were up 15 per cent to Rs 68,675 crore in the April-June quarter, as per the data released by the finance ministry. India's manufacturing had grown a strong 19.4 per cent in April, suggesting a strong industrial recovery. Advance tax collection in the first quarter was up by 31.4 per cent to Rs 26,876 crore as against Rs 20,456 crore in the same period last fiscal.

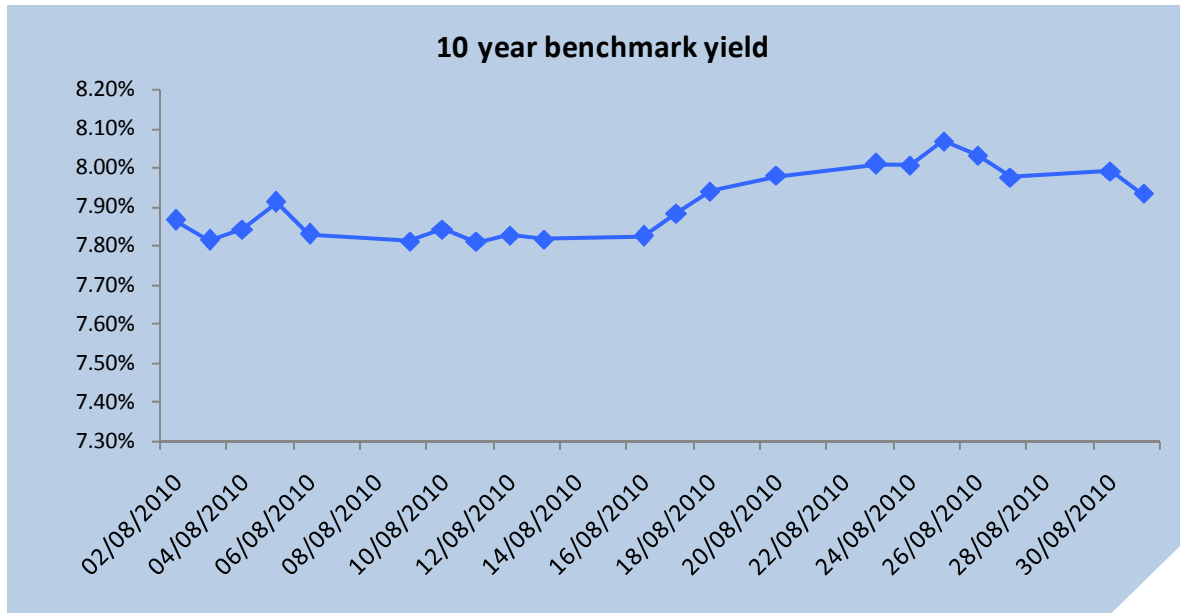

Govt eyes Rs 21,000 Cr bounty from oil PSU divestments

The government is planning to sell 5 per cent stake in Oil and Natural Gas Corporation (ONGC) and 10 per cent in Indian Oil Corporation (IOC) to raise about Rs. 21,000 crore this fiscal. DoD's (Department of Disinvestment) proposal is for sale of 5 per cent stake, or 10.6 crore equity shares, in ONGC through a follow-on public offer (FPO). In IOC, DoD has proposed to sell 10 per cent equity through a FPO. Simultaneously, IOC also proposes to sell 10 per cent of the expanded equity capital to raise funds for its expansion plans.

Outlook

With quarterly earnings season over, focus should now shift towards issues like monsoon, inflation and GDP numbers. With good monsoon, food inflation is expected to fall, while manufacturing inflation is still a cause of concern. Policy actions by the Reserve Bank and advance tax figures will be announced in mid September and will be keenly watched. Government is also taking progressive steps like implementation of DTC by April 2012 and likely GST in another year. The government is expected to garner strong flows from disinvestment of Coal India, ONGC and IOC during the year. Mid-cap and small cap segment will see actions driven by improving domestic economy and improvement in the manufacturing activity in the country.

Monthly Debt Roundup – August 2010

Monthly debt market roundup

The bond market witnessed a tumultuous month as yields remained erratic throughout the month. The yield on the 10-year benchmark GOI security soared 13 basis points to end at 7.93 per cent over the month. The month started on an apprehensive note as the after affects of the severe increase in key interest rates in the month of July continued to effect sentiment. Traders gained a small measure of confidence following an RBI official's statement that measures had been taken to control inflation and that food inflation will also ease, due to a good monsoon. In addition, improving liquidity condition in the market prevented a further collapse of bond prices.

Source: CCIL, Bharti AXA Life Insurance

The lower than expected industrial output data for the month of June, at 7.1 per cent and the lower than expected rise in the wholesale price index for the month of July to 9.97 per cent as against 10.55 per cent reported in the previous month improved sentiment.

A significant development during the month was the speculation over a substitute for the current 10-year benchmark GOI security. The trigger for this arose from the high outstanding amount of the 10-year benchmark bond, which has reached Rs. 44,000 crores, and is close to the perceived threshold of Rs. 60,000 crores, for a benchmark bond. As a result traders switched their positions from the 7.80 per cent GS 2020 (current benchmark) towards the 8.13 per cent GS 2022, thereby taking the yield of the 10-year benchmark to an abnormal high. On the other hand the yield for the 8.13 per cent GS 2022 eased owing to better volumes. The RBI stepped in and announced the issuance of the 10-year benchmark bond at its weekly bond auction, following which the yield for the 10-year benchmark bond dropped significantly. This was further supported by the lower than expected cut off fixed by the RBI for the 10-year benchmark bond at its weekly auction. Towards the end of the month, the yield on the 10-year benchmark reached more realistic levels, as the market had been over bearish about this bond.

The RBI in its annual report indicated the addition of 2.9 per cent in the headline inflation due to the hike in the fuel prices in late June. Furthermore, the report reiterated the central bank's commitment to contain inflation. In addition to the monthly inflation, there was a welcome decline in food inflation for the week ended 14th August, which stood at 10.05 per cent as against 10.35 per cent recorded in the previous week.

The inevitable rise in the key interest rates foreseen by the traders in the September policy review by the central bank appears to be factored in the bond prices. The month ended on a concerned note as the traders anticipated liquidity to tighten in the near term owing to the advance tax outflows in the middle of September.

In the international market, the US treasury yields eased on the back of the US Federal Reserve's plans to buy back US government debt. The 10-year US Treasury bond yield ease by a large 47 basis points to 2.47 per cent over the month.

Corporate Bond

The continuous fall in the corporate bond prices owing to the expected rate hike by RBI kept investors at bay thereby reducing the quantum of trading in corporate bonds. During the month of August trading in the corporate bond lowered to Rs. 50,403 crores as against Rs. 63,782 crores recorded in the previous month. The spread between the G-sec and the corporate bonds had not changed significantly over the month. The spread between the AAA rated corporate bond and the G-sec of 6 – 8 years dropped seven basis points during the month.

Outlook

The Industrial output data for July and the WPI inflation for the month of August, to be released in the second week of September will play a key role in the quantum of rise in the interest rates in the mid-quarter monetary policy statement due on 16 September, 2010. In September 2010, the government is slated to sell securities worth Rs. 34,000 crores in three tranches. The sentiment is likely to remain bearish owing to the high outstanding of the 10-year benchmark security.

The Industrial output data for July and the WPI inflation for the month of August, to be released in the second week of September will play a key role in the quantum of rise in the interest rates in the mid-quarter monetary policy statement due on 16 September, 2010. In September 2010, the government is slated to sell securities worth Rs. 34,000 crores in three tranches. The sentiment is likely to remain bearish owing to the high outstanding of the 10-year benchmark security.
